

Be Instantly Notified In An Emergency With RAVE Panic Button

What is RAVE Panic Button?

RAVE Panic Button is a smartphone mobile app. With the push of a button, the RAVE Panic Button app immediately dials 9-1-1, while simultaneously sending notifications to people on-site of the incident for a faster and more effective emergency response.

When is my location used?

The RAVE Panic Button app uses your location at the time you activate it to determine whether to treat your call as an activation of the system (generating emergency notifications to campus administrators and law enforcement) or as a regular 9-1-1 call (if you are not on campus at the time of your call.) The app only accesses your location when you press one of the emergency buttons in the app or use the Test function in the menu. If your location cannot be determined, your call will be treated as a regular 9-1-1 call.
